We are in tune to many problems and challenges of Computer networking, internet connectivity, and telecommunication Support Services and computer security, whether you are small business or home office user, our quality of computer services stands above the rest in Uganda.

Vision

To become the leading provider of ICT Services and Solutions in the Region.

Mission

☑ Provide high quality and affordable software, hardware, and support services to our customers

that help them achieve their business goals ☑

☑ Build a reputation for integrity and professionalism ☑

☑ Attract top talent to the workforce by providing a good working environment, professional growth opportunities, and a respected brand ☑

Our Philosophy

Our approach is simple - we refuse to compromise when it comes to quality. We set our standards high and then we aim to surpass them. We do this by investing in the continuous improvement of our products and services by building a team that is knowledgeable and dedicated to ensuring that we exceed the power needs of our customers.

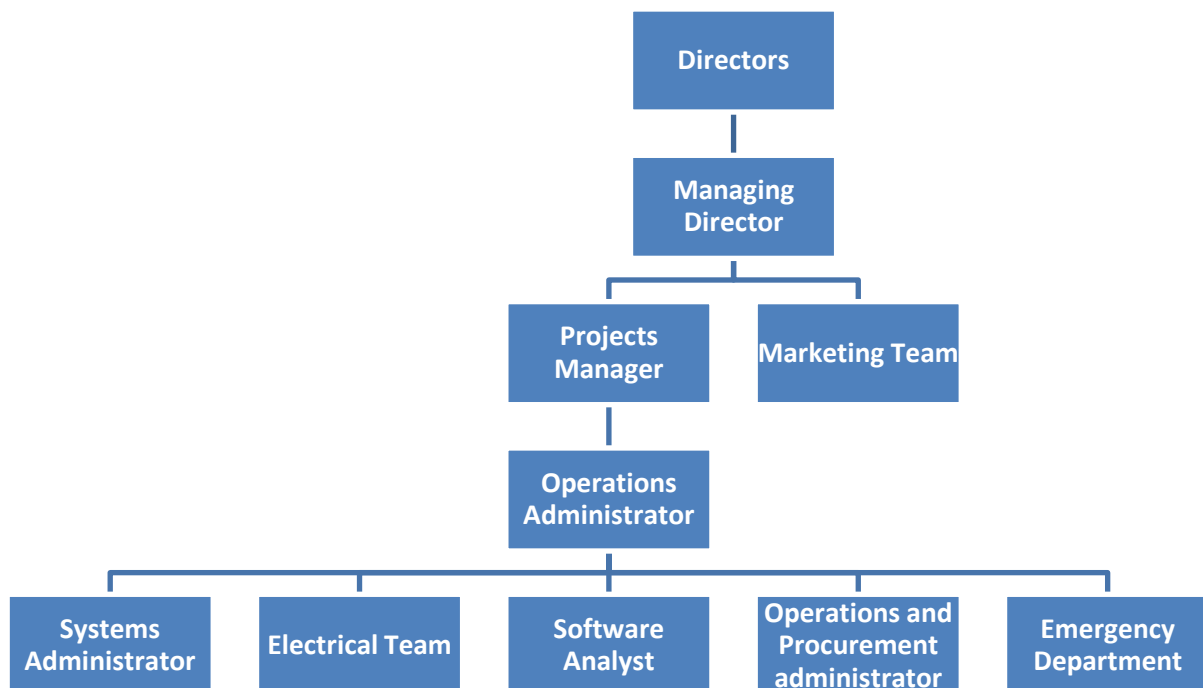

The Company and Business

E-WAY S&I Technologies Ltd was started in August 2011 and fully Incorporated in 2014 and has developed and established a recognized position in the ICT Services market in Uganda. From a position of maintenance organization, doing repairs of ICT and consumer electronics for businesses dealers and manufacturers, all our service provisions are strategically based at a Centralized workshop located in kampala for security, safety and convenience for both our clients and us. We are a healthy company due to efficiency, training of employees and our modern service software, choice of business activities, sales, pricing etc.

As an independent organization we possess the know-how for almost all ICT and Consumer Electronic products. Our knowledgeable employees, advanced service methods and the direct availability of a range of components/equipment form the broad and solid basis on which we operate. In addition, we are also very aware of our customer's requirements. Meticulous procedures, quality control, quick services and competitive prices which make E-WAY an attractive partner for both private users and companies.

E-WAY S&I Technologies Ltd Organizational Chart

E-WAY has adopted a flat structural management and open office systems to allow efficient services delivery. The Managing Director is involved in decision making by departmental heads on a daily one to one basis. This eradicates unnecessary bureaucracy and ensures a fast delivery of services. Each department is organized in terms of performance directed and managed by a management head.

IT networking and Network Support services

Our engineers are Cisco Certified Engineers, Siemon Certified Installers, Microsoft Certified Professionals and we utilize standard Windows operating systems, to provide a reliable and cost effective solution that minimizes staff training and the task of network management. As with all the services we provide our first priority is to fully understand your business and your current work practices. From this analysis we can tailor a network solution that exactly matches your requirements

After agreeing the cost and design to custom build your server, install the cabling and set up each individual workstation for use. Once the network is up and running you will wonder how you ever managed without it.

- ☐ Maintaining network peripherals (printers, scanners, firewalls, etc.) ☐
- ☐ Installing network file servers ☐
- ☐ Installing network application and database servers ☐

Managed Anti -virus Protection

Why Choose a Managed Anti-Virus Solution for Your Business? It is estimated that computer viruses cost businesses more than a billion annually with over 30% of this activity taking place in Uganda. Not surprisingly, responsible business owners and managers seek to safeguard their data and IT systems from these threats. To attain this security, businesses are typically expected to lay out hundreds, if not thousands of shillings in upfront licensing and installation fees. From there, effectiveness depends almost exclusively with the application being used, and no one actually monitors the anti-virus software to see that protection remains in place. E-WAY AFRICA Ltd

Computer Systems Offers Your Business a Better Way to Stay Protected! We ensure your virus definitions, patches and updates have been downloaded and applied to every PC and server on the network

- We will be automatically alerted of any virus activity on your network and which computer is infected
- There are no more annual subscriptions and costly licensing fees
- You will automatically receive the most up to date anti -virus software versions as they are rolled out
- Your anti -virus program status automatically restarted when it is canceled or stopped

Types of Antivirus software we provide and support

AVG,
Kaspersky
Symantec
Avast.

Public Address System Installations

Are looking for public address systems that are designed to be powerful and meet your sound

reinforcement needs on the go for both indoor and outdoor events? E-way Africa confidently give

your next presentation and successfully host a live event assuring you are clearly heard by all

IT Network Assessment

Do you have the right IT architecture plan to support your business? How can you grow your existing business, expand your IT flexibility and still keep your costs down? Whether you are looking to build a new network from the ground up or you are looking for an IT expert to review your existing strategy, Dell offers a very reasonably priced IT Network Assessment that provides customers with a "second set of eyes" to ensure your plan is the right one and that you have considered all of the potential solutions prior to making a significant investment on new infrastructure.

Our trained consultants will review your business needs, technology objectives and inventory your existing hardware. Based on that information, we will draft a Network Solution Proposal that details required hardware and software solutions tailored to your business and IT needs.

The IT Network Assessment is designed specifically to offer small- and medium-sized businesses a quick and simple way to assess their IT needs without the heavy cost and commitment. It is ideal for a company that wants a second opinion or starting point to help them determine the right plan for their IT infrastructure.

Common Customer Questions:

- Who can help me with my IT needs?
- What hardware, software and solutions do I need?
- How do I set up my new network? How do I keep it secure?
- Is my plan the right one for my business?

E-way S&I Technologies limited

Our Answer: E-WAY S&I TECHNOLOGIES IT Network Assessment

Let us visit your office and perform an IT Network Assessment. Whether you need a brand new

network or are considering updating your existing infrastructure, our consultants help ensure you are on the right track. Our trained experts are up to date on the latest technologies and have planned and deployed thousands of IT solutions from setting up a simple replication solution for a local company,

to planning and building out a complete IT network and infrastructure for a multinational corporation.

Dell IT Network Assessment is the perfect way to ensure that your plan is the right one. For additional information or to set up a scoping call, please call us directly at 1-877-758-3355 or contact

your local Dell account representative to arrange to speak to a services expert.

Storage and Data Center Planning

Deciding on the appropriate storage and/or data center solutions to meet your IT needs can be a challenge. Whether you're a new business looking to build out new infrastructure or an existing business looking to virtualize or build out a fail-safe disaster-recovery plan; **Dell's**

Storage and Data Center Planning

services can assist with the right solutions, hardware and consulting experts to help with your strategy and deployment. Dell's Storage and Data Centre Planning experts breakdown each project in steps to keep it simple for you and your business. Our Dell Solutions Architects have partnered with thousands of small and Medium-sized businesses, planning and implementing the latest strategies and technologies.

Our consultants use a four-step process to assist your company with the right plan and solutions to fit Your business needs and budget.
